Portfolio | **LinkedIn** | **GitHub**

Profile

Aspiring IT specialist focused on system integration, network administration, and defensive security. Hands-on experience with Windows Server, Active Directory, Linux, virtualization, pfSense, Splunk, and endpoint monitoring through internships, lab work, and well-documented technical projects.

Technical Skills

Networking: Cisco IOS, TCP/IP, VLANs, DNS/DHCP, Wireshark, GNS3, SSH/RDP
Systems: Windows Server, Active Directory, Linux, Hyper-V, VMware
Security: pfSense, Suricata, Splunk, WMI, Syslog, Firewall, Nmap
Development: Python, JavaScript, HTML/CSS, Node.js, Express, MongoDB, Git

Experience

Regional Multiservices Company Fès-Meknès (SRM) — Apr 2026 – May 2026
IT Network Intern — *Taza, Morocco*

- Supported network operations with a focus on troubleshooting, user support, and foundational security tasks in a regulated infrastructure environment.

IQRA Company — Jan 2026 – Feb 2026
IT Network Intern — *Casablanca, Morocco*

- Monitored and administered network systems and services through SSH and RDP while providing remote support in an enterprise environment.

Click Service — Jun 2025 – Sep 2025
IT Specialist Intern — *Taza, Morocco*

- Completed software and operating system installations with a 98% first-time completion rate, improved inventory accuracy by 20%, and set up or maintained more than 10 local networks while reducing post-installation support requests by 25%.

Ministry of Health — Oct 2022 – Dec 2022
System Administration Intern — *Taza, Morocco*

- Assisted with Hyper-V deployments that reduced test-environment setup time by 30% and supported more than 50 Active Directory requests.

Selected Projects

LeagueSkins — Ongoing
Open-source maintainer and reverse engineering — *Remote*

- Maintained the asset database for an application with 10K+ daily users worldwide, reverse-engineered binary files, and coordinated regression testing before releases.

PortGuardian Enterprise — 2026
USB threat detection and response system — *Security project*

- Co-developed a Windows endpoint agent in Python and PyQt6 with WMI USB monitoring, six-stage local file analysis, automatic device ejection, network isolation, and Splunk Syslog integration.
- Validated 350 ms average USB detection, 95%+ detection with under 5% false positives on 200 samples, 98% USB ejection success, and 99.8% alert delivery reliability across 1,000 Splunk events.

Education

Institute for Applied Technology (ISTA) — Sep 2024 – Jul 2026
Technicien Spécialisé en réseaux et systèmes informatiques — *Taza, Morocco*

- Focused on network administration, Linux servers, virtualization, and Windows Server management.

Hann. Münden Clinic — 2023 – 2024
Six-month orientation phase in nursing specialist training — *Hann. Münden, Germany*

Polydisciplinary Faculty of Taza — Sep 2021 – Jun 2022
Foundation studies in Mathematics and Computer Science — *Taza, Morocco*
